

Insurance / Forensic Analyst Position

Budget: S\$50k to S\$60k per annum

The position of Analyst is a unique opportunity for a dynamic individual with two or three years accounting based experience, who is looking forward to completion of their CA/CPA qualifications, to join our growing Risk Accounting team. The position is Singapore based, and offers the opportunity of some international travel.

In this newly created role you will:

- Investigate research and collate financial, statistical and other information for inclusion in detailed reports.
- Undertake financial analysis for quantification of damages/losses and extrapolation of data.
- Research and analyse specific industries/organisations, identify issues and draw conclusions.
- Apply technology for basic financial modelling and analysis.
- Report writing for the smaller matters
- Communication and liaison with insurance brokers within Company and external clients.

To be successful in this role it is essential that you have excellent analytical, interpersonal, time management and communication skills. Advanced Excel is essential. You will be provided with on-the-job training and be supported throughout your career.

The role offers opportunities to advance both within the Company's Risk Accounting team and within the Company as a whole. Promotion within Company's Risk Accounting will lead towards a lead consultant role taking charge and project managing individual engagements, and the marketing and general promotion of Risk Accounting both within the Company and to existing and potential clients.
